About This Game

Forget everything you've learned about combat. Cobalt's slo-mo mechanic lets you perform moves that other games can't comprehend. Play through the story and discover answers to mysterious questions including: What happened to the humans? Why am I riding a space hamster? How is my cyborg head so good at deflecting bullets? Multiplayer is a less cryptic, though equally enjoyable affair: face off against friends and enemies in local or online multiplayer, learn the intricacies of over 80 maps and 67 weapons, and dominate the leaderboards.

- Enjoy 6 multiplayer modes on over 80 maps. Play locally or online.
- Wield over 37 ranged weapons, 33 melee weapons, 6 hand shields, and more...
- Use Cobalt's signature move - the combat roll - to deflect projectiles or line up sweet headshots.
- Take advantage of our automatic-extreme-slo-mo mechanic, to pull off sick manoeuvres like rocket punches, bullet deflects, or last-second goals
- Customise weapons and armour to your personal taste.
- Play through the story alone or in co-op. Tame wasps! Take part in unnecessary dancing mini-games. Make friends with birds then get sad when they explode into puff of feathers

Six game modes

- Survival Mode: Face off against waves of enemies, upgrading equipment between rounds.
- Combat and Speed challenges: test speed, agility and combat skills in a wealth of challenges. Take your place on the global leaderboards.
- Deathmatch: Go head to head in free-for-all showdowns or team-based battles.
- Team Strike: No respawns. Multiple rounds! Equipment upgrades! Cobalt's most original mode.
- Plug Slam: The most popular sport in the Cobalt universe. Slam the plug into the goal to win. Don't die!
- Story Mode: Discover the secrets of a remote colony alone or with a friend in local co-op. Includes puzzles, boss fights and tameable pets.

Cobalt is the brainchild of Oxeye Game Studio, which consists of Jens Bergensten, Daniel Brynolf, and Pontus Hammarberg. It's published by Mojang.

Title: Cobalt

Literally the best game I have ever played.

Everything on the trailer is accurate, and I want a sequel, but due to the lack of community grown (compared to other Mojang games) it probably won't happen. The IGN review is an absolute liar, don't trust him, he can't play video games.

Either way:

Buy the game, but good luck trying to find people to play with outside of the 10 people who still play the game.

Don't buy the game, just play the (extremely buggy) demo, and play with friends who also have the demo. It's a great game either way, just it's a fat rip on the community side of things (again, bar the 10 people).
